All enrollments are as of the third Friday in September. The public school enrollment projections are based upon trends observed in the number of students moving from grade to grade. The trend, calculated as an average cohort survival ratio, was used to estimate enrollments for first through twelfth grade. Kindergarten enrollments were estimated from an average ratio of kindergarten enrollments to the cohort born five years prior. Beginning with 1978-79, the grand total enrollment was taken from the Certified Enrollment form as reported to the Division of Financial and Information Services.

* Other refers primarily to special education students not associated with a given grade level. This is not a count of the number of special education students in the state. Due to the continuing trend of districts reporting special education students within specific grade levels, fewer special education students are represented in the category 'other' in recent years.
